GeoTrust

GeoTrust® True BusinessID with Extended Validation (EV)

Make a strong security statement with the green address bar. GeoTrust® True BusinessID with EV (Extended Validation) is our premium business-class SSL security product, visually confirming the highest level of authentication available among SSL certificates. It gives your customers two highly visible ways to confirm that your web site is secure—the green address bar and the GeoTrust True Site Seal—while providing strong encryption to protect their confidential information.

The green bar says it all. If the GeoTrust True BusinessID with EV certificate could talk, it would say "Look at me! You are very secure." Web site visitors really notice it when the address bar turns green in their browsers and the organization field starts to rotate between your business name and GeoTrust's name. A GeoTrust True BusinessID with EV certificate announces that your site is legitimate and backed by a reputable authenticating security partner.

Have questions? We want to help. We are just a phone call, email or chat away. Other companies make support a hassle, but not GeoTrust. Our team is here to answer your questions. Remember— when you work with GeoTrust, you always receive help from SSL experts, not internet generalists.

Is True BusinessID with EV right for you? If you can answer yes to any of these questions, then

GeoTrust True BusinessID with EV is the best choice for your business:

- Do you need a highly visible way to show web site visitors that your site is safe?
- Do you need to protect confidential customer transactions on your web site?
- Does your business need to protect its brand against phishing attacks?
